Welcome to Montréal, Canada

The second largest city in Canada, located on the majestic St-Lawrence Seaway, Montréal is an international hub for business travelers and the gateway to the province of Québec. Accessible by air, land and sea, this vibrant metropolis is surrounded by boreal forests and picturesque communities. The climate in the month of May has an average daily temperature of 17° C (63° F), perfect for business or leisure.

Montréal is renowned for international cuisine and diversity of cultures. Being a city of knowledge with numerous learning institutions, Montréal is a center of excellence for several sectors including life sciences, AI, hydroelectricity, and aeronautics.

Host of the Expo '67 and the 1976 Summer Olympics, it has numerous landmarks such as the Olympic Stadium, Notre-Dame Basilica, Old Montréal, and the Mount-Royal Park. The city is a bike-friendly destination with its bike-share BIXI services and has over 900 km (560 miles) of interconnected paths for cycling, walking, or running.

About SpaceOps 2025 in Montréal

For more than 25 years, the SpaceOps Conference has been a technical forum for the space operations community that addresses state-of-the-art operations principles, methods, and tools. The scope is intended to cover all types of spaceflight missions, including human and robotic, near Earth and deep space exploration.

SpaceOps provides a technical and managerial forum for experts of Space Operations (Mission and Ground Segment Designers, Mission Operators, Engineers in charge of mission logistic support, etc.) to present, discuss and promote technical concepts, emerging methodologies, and measures for advanced Space Operations. The overall aim is to maximize mission return whilst still maintaining the required mission safety within the framework of today's increasingly demanding and complex Space Missions. If your organization is new to the Space Operations domain, we encourage you to come to SpaceOps conference to share your ideas, plans, techniques and technologies with others.

If your organization is already familiar with the Space Operations domain, you will find again a great opportunity to exchange on the latest trends and techniques in our industry, gather necessary feedback for your projects and missions at SpaceOps conference, as well as a chance to develop new ties with colleagues devoted to the space sector.
